As a Software Engineer I've designed, lead and delivered SaaS web applications; designed, implemented and maintained production-grade cloud infrastructures; and imagined countless solutions for very complex projects.

Experience (2008 → Present)

Backend Developer, Modern Tribe

Modern Tribe is an American web agency. They created the Events Calendar WordPress plugin and are dedicated to delivering premium web experiences for enterprise clients.

Worked as the lead backend developer for multiple projects from high profile enterprise customers like Harvard.Edu and Rakuten Advertising.

Worked on an open source library for the StellarWP brand of products to retrieve telemetry data using WordPress internal statistics.

- Tech Stack: WordPress, MySQL, PHP, Docker, GitHub Actions, WPEngine, Pantheon, AWS

Senior Software Engineer, Castos

Castos is a premium podcast hosting company offering services like accurate listening analytics, integrations to all major distribution platforms and podcast editing services with a full team of audio engineers and writers.

- Tech Stack: Laravel, MySQL, Docker, Cloudflare

Full-Stack Engineer, Pfizer

Developed automated security-scanning solutions for all internal repositories in GitHub using Snyk and GitHub Actions; and worked in one of the main internal application deployment platforms, Stratus.

- Tech Stack: Laravel, RDS, PHP8, VueJS, SCSS, Docker, AWS, Snyk.
- Created internal composer libraries to share code across projects.
- Led development of the security platform, reducing the time to react to a reported high-vulnerability by 95% (compared to other Snyk customers).

Full-Stack Engineer, D4

D4 is an Australian media company specialized in Webinars, Video Courses, e-Commerce and Professional Blogging. They publish several blogs and web applications based on WordPress.

- Tech Stack: WordPress, MySQL, PHP, JS, SCSS, Cloudflare
- Developer lead for 8 years, launched redesigns for all internal products.
- Designed multiple in-house WordPress plugins
- Maintained cloud infrastructure of over 20 production sites with 1-2 million unique visitors per month.
